BIBLIOGRAPHY OF SCIENTIFIC WORKS OF THE INSTITUTE  
OF THE PHYSICS OF METALS UFAN FROM 1932 TO 1947

Trudy Instituta Fiziki Metallo<sup>v</sup>

STAT

  
BIBLIOGRAPHY OF SCIENTIFIC WORKS OF THE  
THE  
INSTITUTE OF ~~PHYSICS~~ PHYSICS OF METALS  
UFAN FROM 1932 to 1947

ABBREVIATIONS

DAN SSSR -- Reports of the Academy of Sciences USSR

ZhETF -- Journal of Experimental and Theoretical Physics

ZhTF -- *Journal of Technical Physics*

Trudy IMM UFAN -- Works of the Institute of Metallophysics and  
Metallurgy of the Ural Branch of the Academy of Sciences USSR

Trudy IFM UFAN -- ~~Works~~ *Works* of the Institute of ~~Physics and Metallurgy~~ *the Physics of Metals*  
of the Ural Branch of the Academy of Sciences USSR (the name of the  
Institute of Metallophysics and Metallurgy was changed to Institute  
of ~~Physics and Metallurgy~~ *the Physics of Metals* in 1945)

UFN -- *Progress* Achievements of Physical Sciences

Sov. Phys. -- Physics Journal of the Soviet Union [German]

J. of Phys. -- Journal of Physics (USSR) [English]

Techn. Phys. -- Technical Physics of USSR [English]

1. MAGNETIC PROPERTIES OF MATTER

A. Magnetic Properties of Gases and Vapors

1. R. I. Yanus and Ya. S. Shur. A New Method of Determining  
the Magnetic Susceptibility of Gases and Vapors. DAN SSSR, 2, 465,  
1934.

2. R. I. Yanus and Ya. S. Shur. Magnetic Properties of the  
Vapors of Benzene. Nature 134, 101, 1934.

3. Ya. S. Shur and R. I. Yanus. Magnetic Susceptibility of the Vapors of Bromide. ZhETF 5, 401, 1935. Sow. Phys. 7, 501, 1935.

4. R. I. Yanus and Ya. S. Shur. The Bond in the Molecule of CO. ZhETF 5, 28, 1935. Sow. Phys. 7, 19, 1935.

5. S. K. Sidorov and Ya. S. Shur. Magnetic Susceptibility of Certain Organic Compounds. Nature. 137, 317, 1936.

6. Ya. S. Shur. Magnetic Susceptibility of the Gases of Organic Compounds. ZhETF 7, 238, 1937. Sow. Phys. 11, 194, 1937.

7. Ya. S. Shur. Magnetic Susceptibility<sup>6</sup> of the Vapors of Mercury. Nature 239, 804, 1937.

8. Ya. S. Shur. Diamagnetism of Vapors and Gases. UFN 20, 410, 1938.

#### B. Magnetic Properties of Metals and Alloys

9. K. V. Grigorov. Iron or Permalloy. ZhTF 2, 21, 1932.

10. Ya. G. Dorfman. Magnetic Properties and Chemical Bonds in Alloys. ZhETF 3, 293, 1933. Sow. Phys. 3, 399, 1933.

11. R. I. Yanus and V. I. Drozhzhina. Condition of the Atom of Cerium in the Metallic Lattice. DAN SSSR 2, 411, 1934.

12. Ya. G. Dorfman. Magnetic Properties and Nuclear Magnetic Moments. Sow. Phys. 7, 126, 1935.

13. V. I. Drozhzhina and R. I. Yanus. New Magnetic Alloy of Very High Coercive Power. Nature. 135, 36, 1935.

14. V. I. Dōgzhzhina and R. I. Yanus. The condition of Atoms of Rare Earth Elements in the Metallic Lattice. ZhETF 6, 250, 1936. Sow. Phys. 9, 72, 1936.

15. Ya. G. Dorfman. Nature of Molecular Bonds in Alloys. "Roentgenography as Applied to the Study of Materials". Edited by G. Kurdyumov; ONTI NKTP 1936, page 49.

16. S. K. Sidorov and Ya. G. Dorfman. Condition of the Nickel Atom in the Gamma-Phase of the Nickel-Zink Alloy. DAN USSR 19, 881, 1938. ZhETF 9, 26, 1939.

#### B. Ferromagnetism

##### (a) Theory of Ferromagnetism

17. S. P. Shubin. The Subject of the Quasiclassical Treatment of Ferromagnetism. ZhETF 6, 105, 1936.

18. S. V. Vonsovskiy. Temperature Ratio of the Magnetic Anisotropy of Cobalt Monocrystals. ZhETF 8, 1101, 1938.

19. S. V. Vonsovskiy. Theory of the Technical Magnetization Curve in Ferromagnetic Monocrystals. I. ZhETF 8, 1805, 1938.

20. S. V. Vonsovskiy. Theory of the Technical Magnetization Curve. II ZhETF 8, 1151, 1939.

21. S. V. Vonsovskiy. Energy of Magnetic Anisotropy and the Critical Field of Ferromagnetics, Cooled in a Magnetic Field. ZhETF 9, 702, 1939.

22. V. <sup>Ye</sup> A. Rudnitskiy. Hall's Effect in Ferromagnetic Bodies. ZhETF 9, 262, 1939.

23. S. V. Vonsovskiy. Quantum Theory of the Magnetostriction of Ferromagnetic Monocrystals. ZhETF, 10, 762, 1940.

24. S. V. Vonsovskiy. Ferromagnetic and Paramagnetic Points of Curie in Ferromagnetics. DAN SSSR 27, 550, 1940.

25. S. V. Vonsovskiy. Generalization of the Theory of Geisenberg-Bloch in the Case of Binary Alloys. DAN SSSR 26, 564, 1940.

26. V.  $\bar{R}$ . Rudnitskiy. The Change of Resistance of Ferromagnetics with the Change in True Magnetization. ZhETF 10, 780, 1940.

27. S. V. Vonsovskiy. Anisotropy of Coercive Power of Monocrystals Cooled in a Magnetic Field. ZhETF 10, 451, 1940.

28. V.  $\bar{R}$ . Rudnitskiy. Participation of d-Electrons of Ferromagnetics in Conductivity. ZhETF 12, 207, 1942.

29. S. V. Vonsovskiy. Mutual Interaction of s- and d-Electrons in Ferromagnetics. ZhETF 16, 981, 1946. J. of Phys. 10, 468, 1946.

30. S. V. Vonsovskiy. Electric Properties of Electromagnetics. AN SSSR (Physics Series) 11, 617, 1947.

31. S. V. Vonsovskiy. Ferromagnetism as a Problem of Regularization. AN SSSR (Physics Series) 11, 485, 1947.

32. S. V. Vonsovskiy. Index of Ferromagnetism. AN SSSR (Physics Series) 11, 477, 1947.

33. S. V. Vonsovskiy. Physics of Magnetic Phenomena. AN SSSR (Physics Series) 11, 463, 1947.

34. S. V. Vonsovskiy and Ya. S. Shur. Ferromagnetism.

Gostekhizdat. (The paper was written mainly in prewar years and completed in 1946. For technical reasons the book was published in 1948)

(b) Technical Curve of Magnetization

35. H. H. Bldoyev. The Effect of Elastic Elongation of Ferromagnetic Material on Curie's Temperature. ZhETF 3, 72, 1933. Sow. Phys. 3, 393, 1933.

36. K. V. Grigorov. Magnetic Properties of Electrolytic Iron. ZhTF 3, 657, 1933. Sow. Phys. 3, 418, 1933.

37. P. A. Khalilayev. Change of Resistance of Magnetite in a Magnetic Field at Low Temperatures. Sow. Phys. 7, 108, 1935.

38. R. I. Yanus. The Curve of Magnetization of Iron Monocrystals. ZhETF 5, 292, 1935. Sow. Phys. 7, 380, 1935.

39. K. V. Grigorov. On The Article by Miller and Milner "Layer Magnetization in Magnetite Crystals". ZhETF 7, 925, 1937.

40. Ya. S. Shur. Anisotropy of Histeresis in Ferromagnetic Monocrystals. II. ZhTF 8, 1817, 1938. J. of Phys. 2, 5, 1940.

41. Ya. S. Shur and P. I. Yanus. Magnetic Histeresis in Monocrystals. ZhETF 8, 67, 1938. Sow. Phys. 12, 383, 1937.

DISSERTATIONS FOR THE ACQUISITION OF LEARNED DEGREES  
DEFENDED BY THE WORKERS OF THE INSTITUTE OF PHYSICS OF  
THE  
S  
METAL ~~WORKERS~~ UFAN DURING THE PERIOD 1932 to 1947

I. PHYSICO-MATHEMATICAL SCIENCES

A. Doctorate Dissertations

1. S. V. Vonsovskiy. Ferromagnetism. Leningrad Physico-Technical Institute, 1942.
2. I. K. Kikoin. New Photomagnetic Effect in Copper Oxide. Leningrad Physico-Technical Institute, 1935.
3. A. P. Komar. Order of Distribution of Atoms in Binary Alloys and Certain Physical Properties of these Alloys. Leningrad Physico-Technical Institute, 1943.
4. A. A. Smirnov. Theory of Electron Movement in the Crystalline Lattice of Regularizing Alloys. Leningrad Physico-Technical Institute, 1946.
5. Ya. S. Shur. Certain Physical Methods to Improve Magnetic Materials. Leningrad Physico-Technical Institute, 1942.

B. Candidates' Dissertations

1. Yu. P. Bulashevich. Calculation of the Elasticity Constants in Certain Metals. Leningrad Industrial Institute, 1940.
2. N. N. Buynov. Roentgenographic Study of the Degree of Remote Order in Alloys of the Au-Cu System. Ural Industrial Institute imeni Kirov, Sverdlovsk, 1943.

3. V. V. Vlasov. Application of Pattern-Making to the Problem of Rail Defectoscopy. Ural State University imeni Gorki, Sverdlovsk, 1947.
4. N. V. Volkenstein. Study of Electric, Magnetic and Galvano-magnetic Properties of Regularizing Alloys of the Nickel-Manganese System. Ural State University imeni Gorki, Sverdlovsk, 1947.
5. S. V. Vonsovskiy. Approximated Theory of the System of Interacting Electrons in the Crystalline Lattice. Leningrad Industrial Institute, 1939.
6. V. I. Drozhzhina. Study of the Link between the Magnetic and Mechanical Properties of Special Steels and the Selection of Magnetic Characteristics for the Mechanical Properties of Special Products. Ural State University imeni Gorki, Sverdlovsk, 1944.
7. A. M. Zagrubskiy. Measurement of the Autodiffusion Coefficient of Gold. Leningrad Industrial Institute, 1939.
8. G. N. Kolesnikov. Plastic Deformation of Aluminum Monocrystals in the First Moment after the Application of Load. Leningrad Physico-Technical Institute, 1946.
9. D. G. Kurno<sup>5</sup>ov. New Method of Measuring Stresses in the Surface Layers of Large Metallic Goods. Leningrad Industrial Institute, 1946.
10. S. A. Nemnonov. Physical Nature of Electrolytical Chromium and of its Carbide Phases. Ural State University imeni Gorky, Sverdlovsk, 1946.

11. M. M. Noskov. Thermoelectric and Galvanomagnetic Properties of Semiconductors. Leningrad Physico-Technical Institute, 1936.
12. V. A. Pavlov. The Effect of Small Quantities of Mixtures Difficulty-Soluble in their Solid Condition on the Process of Assembling Recrystallization. Ural State University imeni Gorkiy, Sverdlovsk, 1946.
13. N. M. Rodigin. Foucau's Currents in Cylindrical Bodies. Ural State University imeni Gorkiy, Sverdlovsk, 1945.
14. F. P. Rybalko. Amelioration of Transformer Steel by the Method of Double Thermomechanical Processing. Ural State University imeni Gorkiy, Sverdlovsk, 1946.
15. M. I. Sergejev. Optical Properties of Metals on the Basis of the Density Matrix. Leningrad Polytechnical Institute, 1937.
16. S. K. Sidorov. The Effect of Regularization on Hall's Effect in Alloys. Ural Industrial Institute imeni Kirov, Sverdlovsk, 1943.
17. A. A. Smirnov. Application of Borne's Electrodynamic to the Theory of Light Diffusion in Electromagnetic Fields. Moscow State University imeni Lomonosov, 1936.
18. D. M. Tarasov. Structural Changes in Alloys of the Iron-Nickel-Aluminum System and the Coercive Force. Ural Industrial Institute imeni Kirov, Sverdlovsk, 1944.
19. P. A. Khalileyev. Heat Conductivity and Electric Conductivity of Alkaline Metals in their Solid and Liquid States. Leningrad Physico-Chemical Institute, 1937.

20. D. A. Ehturkin. Study of Magnetostriction in Monocrystals of Transformer Steel. Ural State University imeni Gorkiy, Sverdlovsk, 1946.

21. L. A. Shubina. The Study of Crystallographic Magnetic Anisotropy of Transformer Steel. Ural State University imeni Gorkiy, Sverdlovsk, 1946.

22. Ya. S. Shur. Diamagnetism of Gases and Vapors. Leningrad Physico-Technical Institute, 1936.

23. E. S. Yakovleva. Sudden Deformation of Zinc Crystals. Leningrad Physico-Technical Institute, 1935.

## II. TECHNICAL SCIENCES

### A. Doctorate Dissertations

1. V. I. Arkharov. Structural Theory of High-Temperature Oxidation of Iron, Steel and Some Other Metals. Metallurgy Institute AN SSSR, Moscow, 1945.

2. V. D. Sadvoskiy. Austenite Transformation and the Heat-Treatment of Alloy Structural Steels. Metallurgy Institute AN SSSR, Moscow, 1945.

### B. Candidate Dissertations

1. K. V. Grigorov. The Ponderomotive Method of Determining Defects. Metallurgy Institute AN SSSR, Moscow, 1943.

2. G. I. Ivanovskaya. The Effect of High Heating Rates in Electric Hardening on the Structure and Mechanical Properties of Steel. Ural Industrial Institute imeni Kirov, Sverdlovsk, 1947.

3. R. M. Lerinman. The Effect of High Heating Rates of Electric Tempering on the Structural Transformations in Hardened Steel and its Mechanical Properties. Ural Industrial Institute imeni Kirov, Sverdlovsk, 1947.
4. M. N. Mikheyev. Control of Structure and Mechanical Properties of Steel and Cast Iron Products by their Magnetic Properties with the Aid of Contact Electromagnets. Leningrad Physico-Technical Institute, 1943.
5. K. A. Malyshev. The Kinetics of Austenite Grain Growth, the Effect on it of Small Additions of Aluminum and other Elements and also of Preliminary Heat-Treatment of Steel. Metallurgy Institute AN SSSR, Sverdlovsk, 1943.
6. A. I. Stregulin. Transformation of Overcooled Austenite in Carbon Steels. Ural Industrial Institute imeni Kirov, Sverdlovsk, 1941.

### III. CHEMICAL SCIENCES

#### Candidate's Dissertation

- V. D. Sadovskiy. Residual Austenite and its Effect on the Properties of Hardened Steel. Institute of General and Inorganic Chemistry AN SSSR, Moscow, 1939.
